

IDS Face-to-Face Minutes November 3, 2015

Meeting was called to order at approximately 10:15 am local November 3, 2015.

Attendees –

Smith Kennedy	HP
Ira McDonald	High North
Brian Smithson	Ricoh
Alan Sukert*	Xerox
Michael Sweet	Apple
Paul Tykodi	TCS
Bill Wagner	TIC
Rick Yardumian	Canon

Was a virtual meeting so all attendees were by phone

Agenda Items

Note: Meeting slides are available at <ftp://ftp.pwg.org/pub/pwg/ids/Presentation/2015-11-03-IDS-F2F.pdf>.

1. Minute Taker
 - Alan Sukert taking the minutes
2. Agenda:
 - Introductions, Agenda Review, Status
 - IDS Charter Review
 - Common Criteria/ICCC Update
 - Wrap-Up
3. Went through the PWG Intellectual Property policy.
4. IDS Charter Review

Went through the proposed updated IDS Charter to reflect the new “hibernation” status of the WG located at <ftp://ftp.pwg.org/pub/pwg/ids/wd/wd-ids-charter-20151023.pdf>. The following comments were received:

- Update the document editors to only include Ira.
- Use the word ‘reactivated’ instead of ‘resurrected’.
- Add to the goals discussion one or two sentences indicating why the IDS WG is going into “hibernation”.
- Line 142: Capitalize ‘binding’.

Al Sukert will make the updates and then send out the update to the IDS WG by email for final review and approval. Once IDS WG approval is obtained will work with Ira to follow the proper process to get the updated IDS Charter approved by the PWG Steering Committee.

5. Brian Smithson reviewed the latest status of the new Hardcopy Device (HCD) Protection Profile (PP) Technical Committee (TC) and the meetings held in Sep 2014 at Windsor UK as part of the Common Criteria User’s Forum (CCUF) – CC Development Board (CCDB) Workshop. The slides are part of the meeting slide set referenced above.

The following points were made as part of the discussion:

IDS Face-to-Face Minutes November 3, 2015

- The Japanese Scheme (JPA) has set up a transition period of unknown length when certifications using the existing IEEE 2600.1 PP and the new HCD PP will be allowed. Are interested when the use of the new HCD PP will be mandated by JPA; it is already mandated by NIAP.
- Brian mentioned that the new HCD PP does require evaluations at EAL1+ so it meets the current criteria for recognition by the CCRA. That means that other countries besides the US and Japan can use the new HCD PP.
- Korea has concerns with the new HCD PP because Korea doesn't use FIPS and the new HCD PP does not include some cipher suites that are required by the Korean Scheme. It was pointed out that the issue of each country having different crypto requirements is a big issue and a hot topic that will have to be addressed in any collaborative PP (cPP) that may spring up to eventually replace the HCD PP. However, as was pointed out no activity towards a new HCD cPP will not occur for at least 6-12 months.
- It was pointed out that IEEE 2600.1 and IEEE 2600.2 are still valid recognized PPs so other Schemes can certify HCDs against either of these two PPs.
- The new HCVD PP requires "exact conformance" which means that only the exact SFRs/SARs in the HCD PP can be followed – no more and certainly no less.
- There may be a version 1.1 of the HCD PP in the future to address any issues that arise when the first products start getting certified using the new HCD PP.
- NIAP is going to release a policy that will allow FIPS validation to satisfy the crypto requirements in the new HCD PP.
- NIAP has set up a Technical Rapid Response Team (TRRT) to handle questions/comments against the new HCD PP.

Wrap Up

- No future IDS Conference Calls are scheduled since we agreed to handle the approval of the charter update via email.
- No future IDS Face-to-Face Meetings are planned at this time also.
- Actions:
 - a. Al Sukert: Update the IDS Working Group charter to reflect the comments from the meeting.

The meeting was adjourned at approximately 11:00 am local on November 3, 2015.
