IPP Notifications - Requirements

Same scope as IPP v1.0 (mainly end user)

Notification Requestor

Notification Recipient(s)

Notification Content (events, attributes)

Notification Formats (human, machine)

Notification Timeliness (email, immediate)

IPP Notifications - Approach

- Add optional attributes to IPP v1.0 to allow request of notifications with print submission

- Events in IPP Printer trigger the production of notication(s)

- Notification format is MIME (identical or similar to application/ipp) human + machin

- Delivery protocols are email & TBD
