IPP Phone Conference 970319

Attendents:

Scott Isaacson
Steve Zilles
Patrick Powell
Tom Hastings
Bob Herriot
Jeff Copeland
Carl-Uno Manros
Stan McConnell
Randy Turner
Peter Zehler

MOD subgroup - Scott

Scott's latest version is 1.6. Scott is adding some more text,
on conformance etc. We will try to avoid several level of
conformance. Important unresolved issues will be inserted in
the text.

Extensibility differently understood by different people.
We need written text to discuss. May be too late for this draft.
How are we really using enums?

New contribution from Patrick with rewrite of some of the text,
in language closer to computer science. Will this make it more
readable? Comments back to the DL. Do we have time to switch
even if we like it?

Next phone conference for MOD - Friday at 10-12 am PSC. This is
also dealine for comments.

PRO - Bob Herriot

No new contributions so far. Randy and Steve still working on
their contributions.  Randy and Steve to discuss if one or two docs.
Will be sent in as personal Internet-Drafts.  Bob to contact Asad
about his ideas about new message types.  No official WG draft.

Larry Masinter has made a rough draft for a new Internet-Draft on
form-data. Sent out to the DL. Comments to the DL by Friday.
Larry will send it in to the IETF by Wednesday next week.

DIR - Scott

Please review version 1.1 content and give feedback by Friday.

SEC - Carl-Uno

Security requirements (threats, methods of attack) and
identification of security services OK.  Solutions still

missing. SSL might be OK, but not yet on IETF standards track. Other alternatives?  Bob to talk to Asad about getting Netscape's help to get SSL on the IETF standards track. Latest version is ipp-sec-1.02.doc, PDF will be provided tonight.

Add SSL and S-MIME to IETF agenda to attract right people.

Patrick suggested to forget about GSS, which is too heavyweight.

Other Topics - Carl-Uno

We would like to make our Web site a little more attractive in time for Memphis.  We should also clean out most of the old document references when the new drafts are ready.

Editors should contact secretariat now to get names for their documents. No comments will be considered after this Friday!

Final text for the WG Charter is being polished - should be out any day now!

Next week's phone conference only one hour (as our docs will then be with the IETF).  Subjects are final Austin agenda and review of PRO contributions from Steve and Randy.
