Charter

- The Semantic Model workgroup is concerned with the modeling of imaging services and subunits that comprise a network connected Imaging System. The Objectives are:
  - The definition of a framework for the complete Imaging Semantic Model.
  - Drive to a standard semantic definition for an Imaging System's Subunits, Services, Jobs and Documents.
  - Agreement on the semantics of their attributes, operations and parameters.
- *Please vote on the proposed Semantic Model charter!*
  - *Just need two more votes for quorum!*
  - *Abstains count toward quorum…*
