PWG WIMS CIM Alignment
Conference Call Minutes
September 21, 2006

Harry Lewis - Acting WIMS/CIM Co-chair
Ira McDonald - Acting WIMS/CIM Secretary
Meeting was called to order at approximately 2pm EDT, September 21, 2006 by Harry Lewis.

Attendees

> Lee Farrell - Canon
> Rick Landau - Dell
> Harry Lewis - IBM
> Ira McDonald - High North

General Discussion

- Minutes from the September 7 teleconference were accepted.

- Rick summarized his reasoning in the Rationale section of the document.

- Rick reviewed our concensus decisions in the SNMP Objects section of the document.

- prtMarkerColorantRole should be kept a 'C' (because it's spot versus process and not very interesting).

- prtMarkerColorantValue should be changed to an 'A' (because it's actually the colorant name and there is no prtMarkerColorantDescription object).

- prtMarkerColorantTonality should be kept a 'B' (because it's levels of color and merely nice to have).

- Rick summarized some of the issues with representing the tables from the Printer MIB in the CIM Model.

Next Steps / Open Actions

- Rick will post latest edited spreadsheet showing teleconference concensus on the PWG FTP server.

- Rick will talk to CIM modelling experts about class and association structures.

- Ira will research existing uses of arrays of classes (i.e., embedded objects) as properties in CIM Model.

- Next WIMS CIM teleconferences:

> Thursday, September 28, 2pm EDT - scheduled
> Thursday, October 5, 2pm EDT - possible (Harry cannot attend)
> Thursday, October 12, 2pm - scheduled
